

ASSIGNMENT 1

1. `console.log (1 + "2" + "2");`
output:122
explanation:
second and third value can be separated by double quotes and it takes the same value as output and it did not add the value.

2. `console.log (1 + +"2" + "2");`
output:32
explanation:
Adding 1 and +2 and it gives 3. Here the +is with double quotes of 2.So it adds 1 and 2.
3. `console.log (1 + -"1" + "2");`
output:02
explanation:
Here it adds 1 and -1 and it gives 0.
4. `console.log (+ "1" + "1" + "2");`
output:112
explanation:
It could not add any value because all values are in double quotes.
5. `console.log ("A" - "B" + "2");`
output: NaN2
6. `console.log ("A" - "B" + 2);`
output: NaN
